## **DETAILED ACTION**

### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-89 and 92 are drawn to a solid formulation comprising an indolinone of formula I and pharmaceutically acceptable carriers, diluents, binders, disintegrants and lubricants, classified in class 514, subclass 414.
- II. Claims 90 and 91 are drawn to a solid formulation comprising an indolinone of formula I with a proviso that said formulation does not comprise a surfactant and/or a flow enhance, classified in class 514, subclass 414.
- III. Claims 93-100 and 106 are drawn to a solid formulation comprising an indolinone compound of formula I wherein the bulk density of said formulation is at least about 0.50 kg/L, classified in class 514, subclass 414.
- IV. Claims 101-105 are drawn to a solid formulation comprising an indolinone compound of formula I wherein the said formulation is in particulate form, classified in class 514, subclass 414.

The four inventions are independent and distinct, each from the other as they have a separate status in the art as shown by their different and separate subject matter for inventive effort. Further, a reference, which anticipates any one of the above inventions, would neither anticipate nor make obvious of the other inventions. Each

such invention is capable of supporting its own patent. For these reasons, the restriction requirement is proper.

To be complete, applicants' response must include a provisional election even though the requirement may be traverse.
